Technical Skills

Languages and DataBases: Python, SQL, MySQL, Java,Html

Visualization Tools: Tableau, Power BI

Other Skills: Strong written and verbal communication, Time management and organization Problem-solving

And critical thinking, Collaboration and teamwork

Experience/Projects

FRESHER

Project 1: Car Showroom Management System

- Car Showroom Management System is a software application designed to streamline and automate the operations of a car dealership.

- It helps manage vehicle inventory, customer inquiries, sales.

- This system improves efficiency, reduces paperwork, and enhances customer experience. Car Showroom Management System is essential for modern car dealerships to stay competitive and provide an exceptional customer experience while maintaining smooth business operations.

Project 2: Accident Detector App

- An Accident Detector App is a mobile application designed to detect vehicle accidents using sensors like GPS, accelerometer, and gyroscope. It automatically identifies sudden impacts or abnormal movements and triggers emergency alerts.

- This app enhances road safety by ensuring quick response in case of accidents. Send SOS messages with Location to e
